

Great Salt Lake Commission

-- Mission Statement --

The mission of the Great Salt Lake Commission is to:

- develop and use good science to define a healthy Great Salt Lake and Great Salt Lake ecosystem;
- identify or design scientifically-based strategies for the protection and sustainable use of Great Salt Lake and its ecosystem;
- actively seek implementation of sustainable practices and uses that protect Great Salt Lake health and other beneficial uses; and
- provide overall guidance on management of the lake, its watershed and its ecosystem.

* Note: The definition of a healthy lake should include, but is not limited to: sustainable lake and salinity levels; sustainable wildlife and aquatic resources; and water quality in support of beneficial uses.
